

## Newsletter Articles Supplement

Contents:

A hypothesis-free science of inorganic nature

*Georg Maier*

Mathematics as a spiritual science

*Renatus Ziegler*

An overview of Goethe's geological writings

*Christine Ballivet*

What will mankind bring about by trying to gain  
control of heredity?

*Jaap van der Wal*

## Science Group of the Anthroposophical Society in Great Britain

This group exists to promote an understanding of scientific method and results, broadened and deepened by spiritual science; to maintain contacts among those with similar interests; to encourage collaboration and to publish and translate important contributions. The group publishes a newsletter twice a year which includes details of forthcoming meetings and courses, reports, book reviews, information on new publications and details of articles available from members. Starting September 1995, on an experimental basis, an optional articles supplement is available with the newsletter. Initially, it is intended that the supplement should appear annually, but if there is sufficient material it will be issued twice a year. Its content, in English, will comprise research and other relevant articles, short communications and any correspondence these generate. For details regarding the submission of material for publication, please see inside the rear cover.

<b>Contents:</b>	<b>Page</b>
A hypothesis-free science of inorganic nature <i>Georg Maier</i>	1
Mathematics as a spiritual science: Philosophical investigations into the significance of mathematics with reference to Plato, Goethe & Steiner <i>Renatus Ziegler</i>	18
An overview of Goethe's geological writings <i>Christine Ballivet</i>	38
What will mankind bring about by trying to gain control of heredity? - The fundamentals of a world outlook based on DNA <i>Jaap van der Wal</i>	56

### *Author's submissions:*

Material for publication should be sent to the above address. Authors should submit their contributions at least one month prior to the issue in which they would like them to appear. They should aim to limit the length to 20 (A5) sides when printed. Whilst typewritten submissions will be considered for publication (see below), with the increasing availability of word-processors, authors are strongly advised to submit their publications on diskettes. These should be 3.5 inch (5.25 inch by prior arrangement) MS-DOS format, labelled with author's name and filename(s). Author's diskette file(s) may be generated from any popular word-processor software. If you are in any doubt about whether your software format will be acceptable, please contact the editor. Text submitted in ASCII code will also be acceptable. Your diskette should contain no files other than those you wish to be considered for publication and should be accompanied by a printed version of the submission showing clearly the intended layout, special symbols, character attributes, and the position of figures and tables etc. It would also help the publication process considerably if text diagrams, charts, graphs and pictures are submitted on diskette in any file format accessible to the main Microsoft Windows based applications (e.g. bitmaps, TIF files etc). Those not in a position to do this should submit originals rather than photocopies. Each should be identified clearly showing where it should be inserted in the text.

Typewritten submissions should be originals, not photocopies, with no overtyping or hand correction, in A4 format with generous margins and on one side of the paper only. Neither text nor headings should be underlined. Text should be in black ink on white paper. Submitting typescripts of contributions which are otherwise acceptable but are not sufficiently clear for scanning could delay their publication.

### *Ordering copies:*

As this publication is in its initial experimental stages, there is as yet no regular subscription rate. Those who would like to receive copies with their September newsletter should order in advance. Ordering details will be included in the February issue of the newsletter. Further copies of this issue can be obtained at a cost of £3.50 (including postage and packing) by sending your order to:

The Treasurer, The Science Group of the Anthroposophical Society in Great Britain,  
Rudolf Steiner House, 35 Park Road, London, NW1 6XT.

Cheques should be made payable to 'Science Group - AS in GB'
