

Archetype

Newsletter Articles Supplement

Contents:

Elements of a differential and integral
calculus in counterspace

P. P. Veugelers

Progress towards complementarity in genetics

Johannes Wirz

Between discordant eras

Stephen L. Talbott

Correspondence

Ron Jarman, Norman Grant

Science Group of the Anthroposophical Society in Great Britain

This group exists to promote an understanding of scientific method and results, broadened and deepened by spiritual science; to maintain contacts among those with similar interests; to encourage collaboration and to publish and translate important contributions. The group publishes a newsletter twice a year which includes details of forthcoming meetings and courses, reports, book reviews, information on new publications and details of articles available from members. *Archetype*, formerly titled *Newsletter Articles Supplement* and first issued in 1995, is for longer articles in science and mathematics. Its content, in English, will comprise research and other relevant articles, short communications and any correspondence these generate. For details regarding the submission of material for publication, please see inside the rear cover.

Author's submissions:

Material for publication including the author's name and address should be sent to the above address at least one month prior to the issue in which they would like them to appear. They should aim to limit the length to 20 (A5) sides when printed at 10 point. Whilst typewritten submissions will be considered for publication (see below), with the increasing availability of word-processors, authors are strongly advised to submit their publications electronically, either on diskettes or by email .

Diskettes should be 3.5 inch MS-DOS format, labelled with author's name and filename(s). The diskette file(s) may be generated from any popular word-processor software. If you are in any doubt about whether your software format will be acceptable, please contact the editor. Text-only articles submitted in ASCII code will also be acceptable. Your diskette should contain no files other than those you wish to be considered for publication.

Electronic submissions should be accompanied by a printed copy showing clearly the intended layout, special symbols, character attributes, and the position of figures and tables etc. It would also help the publication process considerably if text diagrams, charts, graphs and pictures are submitted in any file format accessible to the main Microsoft Windows based applications (e.g. Wordperfect, Word, Publisher, bitmaps, TIF files etc). Those not in a position to do this should submit originals rather than photocopies. Each item should be identified clearly showing where it should be inserted in the text. The base font size for equations, text and diagrams in this publication is 10 point.

To enable typewritten submissions to be scanned, they should be single-spaced originals, not photocopies, with no overtyping or other corrections, in A4 format with generous margins and on one side of the paper only. Neither text nor headings should be underlined, but any underlining required should be indicated on a separate copy. Text should be in black ink on white paper. Submitting typescripts of contributions which are otherwise acceptable, but are not sufficiently clear for scanning could delay their publication.

Ordering copies:

This publication varies in cost according to issue length and there is as yet no regular subscription rate. Ordering details will be included with the September newsletter. Further copies of this issue can be obtained at a cost of £4.00 (including UK postage; EU add £0.50; elsewhere add £1.00) by sending your order and payment to:
The Treasurer, The Science Group of the Anthroposophical Society in Great Britain,
Rudolf Steiner House, 35 Park Road, London, NW1 6XT.

Cheques should be made payable to 'Science Group - AS in GB'
